

MALGORZATA STASZEWSKA-BUI

Full-Stack Web Developer

As a web developer with a background in aviation, I began as a hobbyist drawn to coding and creating intuitive web experiences. This passion for problem-solving has grown alongside my adventures as a pet sitter and traveler. I'm excited to join a creative team where I can bring fluidity and imagination to projects that enhance user interactions and make a real impact.

Skills

- HTML
- CSS/SASS
- JavaScript
- React
- Angular
- Node.js/Express
- Git/GitHub
- Bootstrap
- MongoDB
- Rest API
- Chrome Developer Tools

Language

- Polish - Native
- English - C1
- German - B2

Projects

● Ecommerce React Application

Coders Lab JavaScript Developer Program

- Professional-grade e-commerce application demonstrating full-stack development Frontend Development: Designed and built an intuitive, responsive user interface using React and React-Bootstrap. State Management: Managed global state using Easy Peasy (a simplified abstraction of Redux) for efficient state handling. API Integration: Integrated product data from FakeStore API and handled order management through a custom RESTful API. Backend Development: Implemented a RESTful API using Node.js and Express, connected to MongoDB to simulate real e-commerce functionality with order management. Deployment: Successfully deployed the application to Netlify to ensure accessibility for potential employers and users.

● MyFlix App

CareerFoundry Full-Stack Web Development Program

- Developed a comprehensive movie database application, myFlix, incorporating both client-side and server-side functionalities to deliver a seamless user experience. Implemented the user interface using React to display a list of all movies. Allowed users to register, update their profile, and manage their list of favorite movies. Designed and built a RESTful API using Node.js and Express. Set up and managed a MongoDB database for storing user and movie data. Ensured secure user authentication and data handling. Technology Stack: Employed the MERN stack (MongoDB, Express, React, Node.js) with Bootstrap for styling and Parcel for bundling. Utilized ES2015+ standards and function components for clean and maintainable code.
